MODULAR TRAY
SYSTEMS IN ISO

Modular tray system in ISO

H+H FlexTray
Close tray

The closed H+H FlexTray is completely leakproof. Therefore, it is particularly suitable for storing items that contain liquids. If something leaks, the tray is easy to clean: Like all three modular trays, the H+H FlexTray can be put into the dishwasher, ensuring the best possible hygiene.

H+H FlexBasket
Basket

Especially when filled, the weight of the modular tray alone can play a big role - for example if the full modular tray is to be moved to a different location. Here, every gram counts. The H+H FlexBasket is helping to keep the overall weight minimal, although robust design achieves strong storage with an optimal overview of the items inside.
H+H FlexModu
Open tray

The design of the H+H FlexModul is patented for a good reason: It combines the ad- vantages of the H+H FlexTray and the H+H FlexBasket. This unique solution thus became our best-selling variant. Leak- proof at the bottom and robust with an optimal overview - the H+H FlexModul is definitely our highlight in terms of utility and flexibility.
CLIP-ON
DIVIDER

Endless flexibility

Whether in the FlexModul, in the FlexTray or in the FlexBasket – the sliding divider creates up to 30% more space. Integrated label holders ensure even more space saving organisation and an optimal overview.

- Flexible divider system

- Incremental adjustable every 10 or 20mm

- High stability as a result of the Clip-On effect

- Labelling options

- On full extension runner or side panel

- Various materials (ABS,PC)

Infinite variety of subdivision

SYSTMZ

ISO tray integration into carpentry Fit-out

618 +2mm -0mm

418 +2mm -0mm

ISO trays can be integrated into your custom cabinet fit-out using the same ISO components and compatible with side panels and full extension runners.

Inquire with Systmz and we will create for you the perfect fit-out solution.
